ISTANBUL, TURKEY

☎ +905554128884 ✉ serhansilahyurekli@gmail.com 📧 serhansilah 🔄 serhansilah 🏠 serhansilah.github.io

## Education

### Sabanci University

*Bachelor of Science in Computer Science and Engineering - CGPA: 3.54/4.00*

Sep. 2017 – Feb. 2022

*Istanbul, Turkey*

### Kadikoy Anatolian High School

Sep. 2012 - Jun. 2017

*Istanbul, Turkey*

## Experience

### Trendyol

*Full Stack Developer*

Mar. 2022 – Present

*Istanbul, Turkey*

- Developed a tool for sellers that **64%** of them start to use it, to design their store more convenient by using **React.js** and **Nest.js**
- Created a Seller Profile tab for **over 100K** sellers on Trendyol by using **React.js** and **Nest.js**
- Gathered metrics, **over 52M** comments and images from **Kafka topics** with a scheduled consumer

### Getir

*Software Engineer Intern*

Sep. 2021 – Feb. 2022

*Istanbul, Turkey*

- Worked on development and improvement of back end systems for GetirFood using **Node.js**
- Wrote unit and integration tests for GetirFood API with **Jest**
- Participated in **Agile** ceremonies and code sprints employing **Scrum**
- Solved bugs to prevent endpoints from being called unnecessary or incorrectly

Jun. 2021 – Sep. 2021

*Data Scientist Intern*

*Istanbul, Turkey*

- Utilized **SQL** for efficient data querying from **AWS Redshift**
- Built an algorithm to place the products in the warehouse optimally to reduce the time for couriers to get product
- Developed **AWS Cloudwatch** logs insights query to detect error existence on logs
- Developed a parallel web and mobile crawler to store contents of more than 10k products using **Selenium** and Python

### Sabanci University

*Learning Assistant - CS 210 Introduction to Data Science*

Feb. 2021 – Jun. 2021

*Istanbul, Turkey*

- Helped students with their data science-related problems in recitations and office hours
- Graded projects of 5 teams and supervised them

### PURE - Sabanci University

*Undergraduate Research Assistant*

Jun. 2020 - Aug. 2020

- Developed a web scraper to collect **over 1 million** TV series' data from IMDB
- Built prediction models by using machine learning algorithms to classify TV series into success categories using **Python**
- Built **RESTful API** using **Node.js** and **Express**

## Technical Skills

**Languages / Databases:** TypeScript, Python, JavaScript, Go, Java, React.js, PostgreSQL, Couchbase, MongoDB, Redis

**Technologies:** Node.js, Docker, Git, GitHub, Bitbucket, GitLab, Jira, Kubernetes, Argo CD

## Leadership / Extracurricular

### Sabanci University SIAM Student Chapter

*Co-Founder & Board Member*

Sep. 2021 - Feb. 2022

### Civil Involvement Projects

*Teaching Student*

Feb. 2018 - Jun. 2018

- Helped kids to understand better about how to solve questions about coding which are too hard for kids and helped primary school kids to improve their coding skills
